

## Teknocare 4250-00 500ml maintenance wax

Teknocare 4250-00 is a ready-to-use water-based emulsion designed to protect wooden surfaces (wooden windows, doors, finishes, balconies, etc.) painted in various translucent and opaque colors to ensure a longer service life.

### Usage:

Before treating the surface with Teknocare 4250-00, clean the entire surface with a neutral detergent solution (such as dishwashing detergent), rinse and dry the cleaned surface. Teknocare 4250-00 emulsion should be applied evenly with a soft cloth and along the surface of the fiber. Allow the surface to dry for at least 30 minutes.

Remember that Teknocare 4250-00 is not suitable for renovating damaged surfaces.

### General information:

Record the date of the inspection and maintenance on your Teknos maintenance schedule, as well as the date of the next inspection and maintenance. Protect the surface from icing! Only empty product containers should be discarded. Product waste must be taken to official reception points (Waste Ordinance):

Contains hydroxyphenylbenzotriazole. May produce an allergic reaction. Do not inhale product vapors / splashes. Use only in well-ventilated areas
